## What is RTASA?

[RTASA](#) (Real Time Accounts of Surveillance Abuse) is an initiative of the [Surveillance Abuse Survivors Network](#) (SASN) to chronicle the real time accounts of abuse through usage of weaponized directed energy (WDE) or surveillance abuse.

All Surveillance Abuse Survivors are invited to join in on this initiative by joining the group on Facebook, or by using the hashtag #RTASA on Twitter, in addition to using the hashtags provided below for organizational purposes.

## Purpose of RTASA

Our motto is something borrowed by founder Brian Marks from another network he has created over a decade ago: "If You See Corruption, Say Corruption".

By posting up in real time the conditions that all Surveillance Abuse Survivors are going through will help to establish two things:

### PATTERN OR PRACTICE

Pattern-or-practice case means a lawsuit, often a class action, in which the plaintiff attempts to show that the defendant has systematically engaged in discriminatory activities. Also that such engagement in discriminatory activities was especially by means of policies and procedures. Typically, such a case involves employment discrimination, housing discrimination, or school segregation. A plaintiff needs to show that a defendant's behavior forms a pattern of actions or is embedded in routine practices; however, inferences of executive or official complicity may be drawn from a consistent failure to respond to complaints or implement corrective measures.

### COMMONALITY OF CLAIM

See Class Action Definition on [U.S. Legal](#)

These things will help Surveillance Abuse Survivors to be able in the future establish proof of their abuse and win court cases via class action. But in order to make this an eventual reality, those who participate in this must be:

1) Diligent - Every person who post their evidence needs to do this on a regular basis in order to show individuals who are not as targeted as we are to understand our plight. This also means that **all posts need to be properly hashtagged, because if the posts are not, then they posts can not be tracked properly.** In addition, all posts will have to be approved, and if the posts are not listed correctly, then the post will NOT be approved.

2) Accurate - Each post needs to have the proper hashtags, the time, the date, and description in all posts.

## Rules:

### **NO PROMOTIONS OR SPAM**

Give more than you take to this group. Self-promotion, spam and irrelevant links aren't allowed. Also, no links to any news articles, or petitions will be allowed.

### **NO GENERAL ACCOUNTS!**

**All posts must give a specific time, date, place, description, and the proper hashtags.** All video and photo evidence need to be associated with the proper time, date, place, etc in all posts, whether directly in the post or in the comments below the post. See below for the format of all posts.

### **NO GASLIGHTING!**

Anyone found to question other surveillance abuse survivors or targeted individuals (SAS/TI) will IMMEDIATELY be removed from the group!

### **NO SLANDER CAMPAIGN**

This group is about collecting evidence to establish patterns and commonality of our claims. This is not a group for accusing others of being infiltrators. Anyone who does this will be removed.

### **NO HATE SPEECH OR BULLYING**

Make sure everyone feels safe. Bullying of any kind isn't allowed, and degrading comments about things like race, religion, culture, sexual orientation, gender or identity will not be tolerated.

## Format of Posts:

All posts should be as follows:

Time - Date - #(State)TI - Type of Harassment  
Description  
#Tags (See Below)

Examples:

1:57 PM 07/05/07 - Noise Campaign - Fire / Police Trucks; Helicopter flyover

# Real Time Accounts of Surveillance Abuse

Guidelines and Hashtags: Updated: May 20, 2019

A vehicle passed me at the corner of Avenue A & Zebra Boulevard hitting its sirens. #NoiseCampaign, #FirstResponderHarassment, #Flyovers, #Helicopterflyovers, #AerialAttack

2:20 PM - 09/13/18 - DEW Attack - Left or Right Arm

At this time as I was washing dishes I received heavy DEW attack leaving me bedridden. #DEWArms, #DEWLeftArm, #DEWShoulders

If we can provide real time information on our attacks, then we can possibly do more to establish pattern and practice and commonality of claim.

## EDITING YOUR POSTS

In order to make all posts easier to organize, when you see a comment with a hastag (i.e. #DEW), you are to edit your post and add the hastag that was in the comments section to your posts.

## HASHTAGS

Hashtags are a very powerful weapon we can use to trace the events happening to us if properly used. Since now we are using this system to track our posts on both Facebook, where the group home is, and on Twitter, we can now show people that this is not just happening to us, but in real time show around the world how heinous this program truly is.

All hashtags should be one word. For example, "Noise Campaign" would be listed as #NoiseCampaign. If it is a noise campaign by a first responder then you would use both hashtags as it is two things that had happened to you.

Note: On Twitter, use the hashtag "#RTASA", and #TIRealTimeAccounts in addition to the following which will be used on Facebook.

Please only use the ones below, do not create your own.
